

All Clear · one page

P021-RS26 · Ars Biologica ArtXScience Residency 2027-28 · **deadline 8am Tue 29 Sep, Sydney** Full detail:
10_ATTACHMENT_full-proposal.md · paste from 07_PRONTO-PARA-COLAR.txt

Submit checklist

☐	Paste the six fields from 07_PRONTO-PARA-COLAR.txt.
☐	Counts already verified with margin
☐	Visual support link:
☐	https://drweli.com/portfolio/ars-biologica/
☐	Website: drweli.com · Portfolio/ORCID:
☐	orcid.org/0000-0003-2457-3658
☐	1-minute video: OPTIONAL by the call's own wording.
☐	Fine to submit without
☐	Read the open-call rights clause before ticking it

☐ **There is no attachment field.** Only the visual support link, which is why every long answer names it.

The work, in one breath

One artwork in three parts: **a pop song, a music film, and a room the visitor walks through**, made from freshwater research at the Biology Centre and shown at Ars Biologica 2028. The room is the artwork; the film is one station inside it. The song also exists afterwards as a release.

The finding. Shabarova et al. 2021, *Nature Microbiology* 6:479. A South Bohemian pond through two extreme-rain floods: dissolved nutrients returned to pre-flood levels **before the microbial community had reassembled**. The water measured as recovered while the life in it was still returning.

The hook, and it is critical. The water can be **declared** recovered while the life in it is still missing. *Who gives the all clear, and on what evidence?* That decision gets made about water, about air, about a place after a flood, and about people. A human reading of the finding, never presented as a scientific claim.

On the title. *All Clear* is polysemic on purpose: clearance and clarity in the water, and the all-clear signal in the human story. Literally true in both. *Come Back Again* was the earlier, softer reading and is retired.

If they ask, the numbers

Artist fee, fixed by the call	€6,000
Production, proposed, sums exactly to the cap	€15,000
Travel, up to	€3,000
Total	€24,000
Contingency inside the production line	8.9% (€1,330)
Two published price lines	Forbes Street Studios · Tomáš Kříž Production
Process videos	15 , January 2027 to festival close
Installation	6 stops across 3 built stations

□ The one request, and how to say it

The call sets the travel itself: “*required travels are 2-5 trips to Budweis; 2 trips to Ars Electronica*”, funded up to €3,000.

From Sydney only the bottom of that range is fundable. A return Sydney to Prague fare is about €1,100, so two crossings consume the allowance almost exactly once transfers and the Prague and Linz rail are counted. The stress case reaches about €4,000.

So the ask is the minimum compliant version of their own specification: two stays in Budweis, September 2027 and March 2028, with both Ars Electronica visits by rail from Budweis inside those stays.

If they require the February/March presence, two honest routes and no third: September becomes a *third* crossing and needs an additional confirmed travel contribution, **or** the first stay connects to the August 2027 family trip to Brazil and flies **Brazil to Prague**, which does fit.

□ Also confirm: **which of the two stays gets the separately funded month of accommodation.**

Who does what

I am principal artist, creative director, songwriter, performer, and I directed the film. I prepare my own body and author the central choreography.

role	who	note
Exhibition lead	ACTPRO , České Budějovice	Built the “ Water ” exhibition for the Czech Academy of Sciences (2020) and the permanent natural science exhibition at the Jihočeské Museum (2019)
Music film	Tomáš Kříž Production · alt. Jakub Jeřábek	Local, publishes rates , so the line has an anchor
Movement	Taneční studio No Limit , ČB	Adult street dance, the vocabulary of pop video. City-supported since 2011
Song production	Forbes Street Studios , Sydney	Universal-owned. □ A booking makes them a supplier . Not a partner, not a Universal release. The A&R review is an optional add-on and is not in the figure

None is commissioned and none has quoted. Say that if asked.

Eligibility, if challenged

More than 5 years of professional creative practice. Performed through the doctorate 2017 to 2021; **a field photograph of mine is published as Figure 2 of my 2021 ANU thesis, p.15, credited “Image credits: Weliton Menário Costa”** (one click from the portfolio page). Photography Project 2023, first independent releases 2023, *Kangaroo Time* 2024. Nine years counted from the doctorate, sixteen with the scientific training.

Italian citizen, eligible to work and travel in the EU, passport to Dec 2033. Based in Sydney.

Never claim

Nic Ververs **produced** *Kangaroo Time*; **I wrote and directed it.** Never “produced” for me, never “filmmaker”. Falling Walls 2025 = **one of 30 shortlisted worldwide**. Never “finalist”, never a rank. The reach figures are **circulation**, never comprehension. Do not put the ACT WWVP on anything. Its status is unverified. A forest-pond finding is never presented as a finding about a managed fishpond.
